

Before booking an installation, you need to make sure you have all the items to make the installation successful.

Checklist

If you have a standard thumb turn lock as pictured below, all you need is the *Glue Smart Lock* and nothing else is required, you should book an installation now.

If your lock is key operated on the inside, or has an all-in-one thumb turn and key cylinder (both pictured below), then you will need a *Glue Smart Lock Compatibility Kit* (available June 2020) before booking the installation. Contact [GlueHome.com/support](https://www.gluehome.com/support) to let us know you need it and we will email you when it is available.
